Letter from the tech.mn Team
Letter from the tech.mn Team

It takes a lot of personal drive, grit, and tenacity to start a business, but it’s always good to have a helping hand. That’s what the Minnesota startup accelerators are all about.

To make sure anyone who wants to join the Minnesota entrepreneurial system has the resources they need, we’ve paired with Launch Minnesota to compile this Ultimate Guide to Minnesota Startup Accelerators. We think it’s a great starting point for anyone with an entrepreneurial spark.

We also know the Minnesota landscape is ever-changing. That’s why we’ll be regularly updating this Ultimate Guide to Minnesota Startup Accelerators to reflect the current state of the scene as accurately as possible. If you want your organization to be included, please don’t hesitate to reach out. This guide can’t truly be “ultimate” without you.

Thanks to Launch Minnesota, our wonderful sponsors, and all of the bright minds that make the Minnesota tech and startup community what it is.

— The tech.mn Team.
In Partnership with: Launch Minnesota
Launch Minnesota is a statewide collaborative effort to accelerate the growth of startups and amplify Minnesota as a national leader in innovation.

Created with bipartisan support during the 2019 legislative session, Launch Minnesota – spearheaded by the Minnesota Department of Employment and Economic Development (DEED) – works with an advisory board, private sector stakeholders, support organizations, higher education, and innovative startups statewide.
Increase access to capital through our grants, tax credits, and direct & in-kind investments by our private sector.

- Launch MN Innovation grants for: Business Operation, Housing/Childcare and matching grant for Phase 2 SBIR-STTR federal grants.
- Angel Tax credit. provides a 25% credit to investors or investment funds that make equity investments in innovative startups.
- Increase private investment to MN startup community through capital or in-kind investment. Check out the list of MN’s current investors.

Build a collaborative statewide network to support entrepreneurs at every stage of their startup journey.

- The Launch MN Network, is uniting 6 regions, 7 hubs & over 60 partners to support startups to improve coordination and capacity across the state’s startup ecosystem aiming to help entrepreneurs navigate the wealth of resources across the state.

Develop entrepreneurial talent by ramping up lean startup education, access to expertise & other coordinated statewide efforts

- Lean Startup Education now offered across MN
- Coming soon ... the MN Mentor Movement

**Events:**
Exclusive Pitch Night reception for gBETA cohort
St. Cloud Connections

A great idea is useless without connection.

That’s exactly what gBETA Greater MN St. Cloud, the Greater St. Cloud Development Corporation, and regional players such as Great North Labs are trying to solve.

“[People] don’t have the connections necessary to really make their business prosper,” Precious Drew, Director of gBETA Greater MN St. Cloud, said. “They don’t really know where to start in order to get it off the ground and running to reach that next step.”

Larry Hosch, Business Development Director of Greater St. Cloud Development Corporation, acknowledged the organization’s role as a connector, but said the real props go to the doers — doers like Drew and the gBETA program.

“We want to make sure our entrepreneurs see those connections,” Drew said. “We’re all right here and ready to help them out.”

Even with the region’s strong university system, Drew said graduates have been unable to see the opportunities and resources right in their own backyard. With continued work, however, she sees St. Cloud emerging as a major entrepreneurship hub — one that not only retains top talent from the universities and underrepresented communities in the region but attracts it from other regions as well.

That said, Drew was adamant the focus of gBETA Greater MN St. Cloud, the Greater St. Cloud Development Corporation, and other regional players is growth — not competition.

“It’s absolutely not a competition,” she said. “We ultimately want to see entrepreneurship in Minnesota grow.”

“We want to make sure our entrepreneurs see those connections. We’re all right here and ready to help them out.”

— Precious Drew

Monthly Red Talks, Monthly E1 Tech Talks, Annual E1 Ignite Cup, ILT Studios Lean Startup Courses, E1 networking and educational opportunities
There’s a lot to be said about gaining a competitive edge in the business world. When it comes to enabling early-stage entrepreneurs, however, there’s much more to be gained through cooperation.

Through Red Wing Ignite’s E1 (Entrepreneurs First) Collaborative, entrepreneurs have access to a network of 14 partners in the Southeast region ranging from agricultural specialists to medical technology. For Stacy Nimmo, Red Wing Ignite’s Executive Director, that web of resources is the core of the organization’s strength.

“We’re able to leverage the strength of the individual organizations and their particular focus,” Nimmo said. “And also the strengths of the various individuals that make up those organizations and what their backgrounds and connections are.”

Before, there was a greater focus on keeping talent to a specific city or region. Shannan Harris, Program Director at Red Wing Ignite, said the times they are a-changin’.

“We all, historically, were very comfortable with that,” Harris said of the tendency to focus on proprietary talent. “Everyone has had to let go of some of that in order for the entrepreneur to succeed and the region to succeed.”

These types of networks look to be crucial for fostering Minnesota entrepreneurs going forward, especially for regions outside of the Twin Cities.

“Everyone has had to let go of some of [the focus on proprietary talent] in order for the entrepreneur to succeed and the region to succeed.”
—Shannan Harris

“The reality is [the Southeast region] will never be an urban entrepreneur ecosystem,” Nimmo said. “But our goal is to grow as a rural entrepreneur ecosystem, and our goal as a rural entrepreneur ecosystem is to meet the needs of rural entrepreneurs which are distinctly different from those who may be living in an urban area.”
The Technology Village Business Accelerator program supports the growth of emerging technology and professional service businesses with a technology focus within an entrepreneurial environment that encourages collaboration, fosters job creation, and provides connections to local & regional resources.

**Programming + Benefits Offered:**
- Mentorship.
- Roundtable with a Board of Directors

When asked about the gamut of scientific endeavors currently being cooked up at University Enterprise Labs (UEL), Diane Rucker, UEL’s executive director, rattled off an impressive list — medical devices, food and agriculture, soil research, alcohol and spirits, biotech, pharma… — with an equally impressive catch-all wrap-up to cap it off.

“Everything from vaccines to super-intense vodka,” Rucker said, laughing.

Focusing on Stage 1 and Stage 2 businesses, UEL is an important destination for Midwest companies looking to make scientific progress. From shared bench spaces to extra room to expand during a growth phase, the St. Paul incubator is a hub for companies on the verge of a breakthrough. Since biotech businesses typically take five to 10 years to become financially viable, Rucker said, the resources are crucial.

“When you think about all of the things you need when you leave a university or corporate setting to start something new, it’s everything from facilities to shared spaces to shared equipment,” Rucker said. “To have that available and affordable basically allows you to start without any outside funding.”

One thing is definitely clear — there’s a demand for space. All of UEL’s 33 full-sized labs are occupied and the one that’s in transition has a four-person waiting list with more inquiring about it regularly.

This, Rucker said, is good news — for UEL and Minnesota.

“Without [these resources] available, it’s not going to happen in Minnesota. It would basically shift biotech and food-ag development to other parts of the world.”

— Diane Rucker

“Without [these resources] available, it’s not going to happen in Minnesota. It would basically shift biotech and food-ag development to other parts of the world.”
The Venture Center, part of University of Minnesota Technology Commercialization (TechComm), has helped spin out 167 companies since 2006, including 19 last year. Three-fourths of these companies have been in Minnesota.

Programming + Benefits Offered:
- The Venture Center runs Discovery Launchpad, a startup incubator and coaching program begun in 2019 that has helped more than 20 startups to date (only for startups based on University of Minnesota intellectual property)
- Discovery Capital, a matching seed fund which works to leverage other investors, mainly local, in funding University startups
- Partnering with other programs throughout the UMN startup ecosystem, numerous startup-oriented open-to-the-public workshops to familiarize researchers with the entrepreneurial process
- Individualized advising from experienced executives and entrepreneurs
- Guidance in the creation of business, financial, marketing, sales and regulatory approval plans
- Guidance in the development of a business pitch
- Shared office space
- Access to workshops and many group educations events throughout the year
